Aluminum Platform Cart

Patent pending and registered design

Professional aluminum platform cart with brake

Design features:

- 240 mm deck ground clearance for improved ergonomics (less bending).
- Ultra-light oval aluminum tube, welded and reinforced with magnesium and titanium.
- Front bumper rollers (wheels) help protect the cart.
- Fixed, offset rear wheels make it easier to handle steps.
- Handle positioned outside the deck to maximize usable storage space.
- Ergonomic handle for a horizontal or vertical grip.
- The deck interior is honeycombed to reduce weight while staying extremely strong with high capacity.
- Non-slip deck.
- Tubular frame structure for simple, effective strapping.

The handle:

- Multiple handle angles let you push or pull the cart without hitting your feet.
- Ergonomic handle for an upright grip or an angled hold.
- Handle set to the European standard height for better ergonomics.
- The cart features a brake system that locks both rear wheels.
- 4 angle options to match user needs (rolling, braking, storing the cart, or lifting it).

Wheels:

- Large, durable gray rubber wheels in 130 and 160 mm for less start-up resistance.
- Ball bearings in the wheels.
- One-piece aluminum rim—very light, very strong.
- New, quiet composite tread with 20% less rolling resistance.
- Non-marking gray tread.
- Rounded wheel profile for smoother rolling.
- Openwork rim for a cleaner design.

Technical:

- Welded aluminum frame reinforced with high-tensile magnesium and titanium.
- Reinforced-fiber deck for excellent impact resistance.
- Deck dimensions:
 - Rebel 400S: 750x490mm.
 - Rebel 400M: 910x620mm.
 - Rebel 400L: 1200x620mm.
- Folded dimensions:
 - Rebel 400S: 1120x490x350mm.
 - Rebel 400M: 1130x620x350mm.
 - Rebel 400L: 1330x620x450mm.
- Lightweight design built around real user needs and features.
